## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hudson et al.

Hudson et al disclose a dental articulator which may be formed as one-piece. See col. 1, lines 23-24 which disclose that hinge 13 may be secured to top and bottom plates 11 and 12, as opposed to being slidably attached thereto. Hudson et al do not disclose upper and lower hinges, but only a single hinge.

It would have been obvious to one skilled in the art to include hinges on both the top and bottom plates, as the use of multiple hinges is well known in the articulator art, and, if one wished for a greater flexibility and range of motion of the upper and lower models attached thereto.

### ***Response to Arguments***

Applicant's arguments filed 7/10/03 have been fully considered but they are not persuasive. \*\*\*.

Although applicant argues that he is unaware of the use of multiple hinges in the art, it is well known that dental articulators may include more than one hinge, to allow

greater flexibility and range of motion (in multiple planes) of both upper and lower models. Applicant's argument that the inclusion of multiple hinges would render an articulator useless has been considered, but is not persuasive.
